RESEARCH & ACADEMIC SUMMARY

Actively engaged in supervised research for over **2 years**, I have contributed to multiple projects across different departments at the University of Technology Sydney (UTS). My experience includes WebArxiv work with the **Australian Artificial Intelligence Institute (AAII)** for my Capstone Project, the cross-university Honour Project Squidle+ **Institute for Marine and Antarctic Studies (IMAS)**, and an international research initiative on Multilingual Debias with **Technology University of Eindhoven (TU/e, The Netherlands)**.

Alongside my research experience, I maintain a strong commitment to academic excellence. I am currently completing a **Bachelor of Computer Science (Honours)** at UTS, specialising in **Artificial Intelligence and Data Analytics**. I have consistently achieved High Distinctions across all subjects **with GPA of 7 (full mark)**, and was recognised on the **Dean's List in both 2024 and 2025.** Earlier in my academic journey, I was awarded a **merit-based scholarship, SM1,** and spent five years studying in **Singapore**, including at the **National University of Singapore**, where I developed a strong academic foundation and global perspective.

PROFESSIONAL SUMMARY

Being employed at the University of Technology Sydney (UTS) for **3 Years**, I begin my tenure as an **Academic Tutor**, where I tutor subjects of Mathematical Statistics, Python Programming, Computer Science Research Studio; I also work as **Research/Industry Project Presenter** at UTS's high-tech visualisation lab, the **Data Arena**. where I deliver engaging demonstrations of immersive 3D data visualisations and interactive environments for public and private tours for academic, industry, and international audiences.

Additionally, I was serving as an **IT Project Management Office Administrator**. In this role, I manage multiple University BAU and Initiative project requests, proactively resolving multiple project request issues, and communicating with multiple Project Managers (Finance, Admin, Resource, HR) in UTS IT department on a daily basis. I also served as **First Year Success Advisor** to help/mentor freshman students' Course Enrolment Planning within the FEIT student community.

UTS RESEARCH EXPERIENCE (June 2024 – Present)

Squidle+**: Human-in-the-Loop Marine Image Classification –** Dr. Jaquomo Monk (IMAS), Dr. Ariell Friedman (Squidle+), Professor Ling Chen, Dr. Yanbin Liu (AAII), *March 2026 – Present*

- Developed human-in-the-loop image classification tools for marine and Antarctic ecological datasets.
- Designed workflows to assist scientists in filtering hard substrates and improving marine species detection accuracy.

WebArxiv**: Evaluating Multimodal Agents on Time-Invariant arXiv Tasks –** Professor Ling Chen (AAII), Dr. Zijing Shi (AAII), *Feb 2025 – May 2026*

- Developed **benchmark and AI-boosted Webagent** for arXiv website.
- Developed reflection algorithm to selectively reflect on previous reactions of webagent to make current decision

Multi-Lingual Bias Evaluation Project - Professor Ling Chen (AAII), Dr. Jiaxu Zhao (Technology University of Eindhoven (NL)), *June 2024 – April 2025*

- Established a **full data-to-evaluation pipeline**—including scraping, cleaning, stereotype filtering, and cross-lingual bias testing—processing over **20,000 samples**.
- Engaged with **complex methodologies** like ILPS, CEAT, and SeT, offering sharp insights that influenced our evaluation framework and interpretation of results.
- Supported **data visualisation and experimental evaluations** with BIAS SWAP and STEREOSET methodology.

EDUCATION

- Bachelor of Computing Science (Honours), University of Technology Sydney (UTS)
- Certificate of Data Analysis, Institute of Data, UTS
- Advanced diploma in Mathematics at National University of Singapore (NUS)

PROFESSIONAL EXPERIENCE

Academic Tutor – Research & Programming & Statistics
UTS – Mar 2024 – Present

- Facilitated 50+ sessions using interactive slides, quizzes, and walkthroughs.
- Helped students build foundational and advanced problem-solving research skills using programming tools and statistical tools like **Excel** and **Minitab**.

UTS Data Arena Presenter
UTS – Mar 2026 – Present

- Delivered interactive presentations of immersive 3D data visualisations to academic, industry, and international audiences.
- Translated complex data and AI concepts into clear, engaging narratives for diverse groups.

IT PMO Assistant Administrator
UTS IT Division – Aug 2024 – Feb 2025

- Maintained PMO dashboards (**Excel**, **Power BI**), coordinated **Jira/Miro** timelines.
- Resolved ServiceNow tickets and handled **weekly reporting for stakeholders** and **research project leads**.
- Audited and processed **project life cycles** using Project Connect.

TECHNICAL & PROFESSIONAL SKILLS

- Programming: Python, MATLAB, C++, OpenCV, GitHub, R
- Data Analysis: Pandas, Scikit-learn, Excel, Qiskit, Power BI
- Tools: Jira, Miro, ServiceNow, SharePoint, MS Teams, Project Connect
- Research Methods: Literature Review, Survey Design, Statistical Analysis
- Soft Skills: Team Collaboration, Report Writing, Workshop Facilitation
